

# Third-Party Training Library

ONBOARD QUICKLY, MAINTAIN COMPLIANCE,  
AND REDUCE RISK.

Consistent training is critical to building a culture of compliance within a organization, but for many companies, the focus is on training employees, with limited or no attention on third parties. Implementing third-party compliance training can not only help mitigate risk, but also meet the increasing expectations of many regulators and enforcement agencies world-wide.

With Steele Compliance Wave's Third-Party Training you can deliver interactive training that's succinct, on-point, and compelling.

“

DOJ and SEC will evaluate whether a company has taken steps to ensure that relevant policies and procedures have been communicated throughout the organization, including through periodic training and certification for all directors, officers, relevant employees, and, where appropriate, agents and business partners.

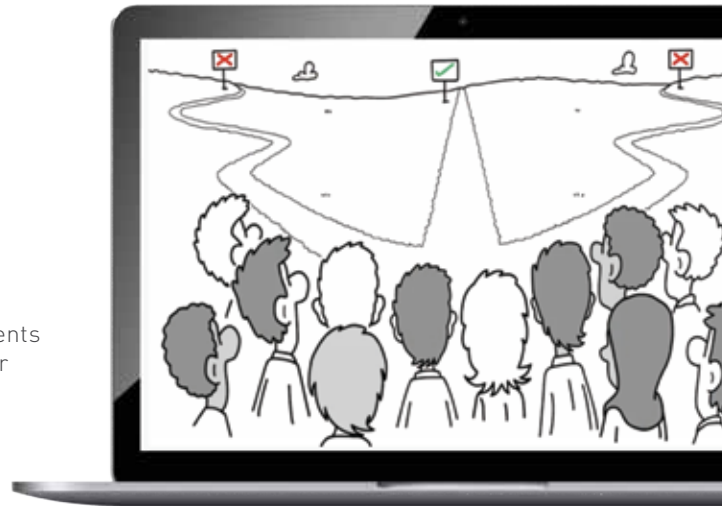

*Resource Guide to the  
FCPA U.S. Foreign  
Corrupt Practices Act*

## COVERAGE

---

Our Third-Party Training Library ensures you can properly cover key topics. In addition to ABAC, the library provides training on a variety of topics including: *Accurate Books & Records*, *AML*, *Conflict Minerals*, *Conflicts of Interest*, *Fair Competition*, *Gifts*, *Human Trafficking*, *Trade Controls* and more. The modules center around animated video segments designed with key behavior-change techniques, allowing you to better engage your third parties quickly and effectively.

## GLOBAL CONTENT

---

Unlike training that relies on live-action video, our animations allow you to serve up translations where tone, meaning, and nuance are properly preserved for a global audience. With native-speaker voiceovers and all on-screen content precisely translated, you'll provide a training experience that is authentic, relevant, and accurate.

## EASY DEPLOYMENT

---

Our content can be deployed easily on Securimate, Steele's third-party management platform, or within your existing Learning Management System. This means you can put the right third-party training modules in front of the right people at the right time, track completions, and better manage your compliance program.

## ABOUT STEELE COMPLIANCE SOLUTIONS, INC.

Steele is your best source for smarter business decisions, offering an integrated risk management solution that will help you to thoroughly evaluate and mitigate potential risks. With products and services that incorporate industry leading artificial intelligence, training, automation, and human diligence, we partner with our clients to help them to not only understand the world of the people they do business with but to arm employees with the right tools and information to continue to make ethical decisions. At Steele we believe we are smarter together - with the right combination of data, insights, technology and people, we can change the world for the better.
